A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be assentiated as the cause. disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or

HOMICIDAL, or as probably such, if impossible to de-

termine definitely. Examples: Accidental drowning;

struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

spinal fever (the only definite synonym is "Epidemic

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

head of "Contributory."

B.                                                                                                                                                                                                     | Registrar                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning;

spinal fever (the only definite synonym is "Epidemic

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

struck by railway train-accident: Revolver wound of

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

Do not accept a certificate of death signed only by a

midwife.

head of "Contributory."

| Birthplace (City and State or County) Occupation  CERTIFICATE OF ATTENDING PHYSICIAN OR MIDWIFE  I hereby certify that I attended the birth of this child, who was Stillborn at On the date above stated.  (Signature)  *Where there was no attending physician or midwife, then the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life attention by                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                  |                                                                                                                                                                          | Color or race that Age at last Birthday 40                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |
| Certificate of Attending Physician or midwife, the the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after high.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 255                                                                              | Birthplace were Mak                                                                                                                                                      | Birthplace (Years)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |
| CERTIFICATE OF ATTENDING PHYSICIAN OR MIDWIFE  I hereby certify that I attended the birth of this child, who was Stillborn at                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                  | (City and State or County)                                                                                                                                               | (City and State or County)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |
| I hereby certify that I attended the birth of this child, who was Stillborn at                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | R n                                                                              |                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |
| I hereby certify that I attended the birth of this child, who was Stillborn at                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | ू हुन                                                                            | CERTIFICATE OF ATTENDIN                                                                                                                                                  | · · · · · · · · · · · · · · · · · · ·                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |
| *Where there was no attending physician or midwife, then the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after high.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 2 8 8 E                                                                          | <b></b>                                                                                                                                                                  | ] =                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |
| *Where there was no attending physician or midwife, then the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after high.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 2 2 P                                                                            | I hereby certify that I attended the birth of this                                                                                                                       | child, who was Stillborn atM.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |
| *Where there was no attending physician or midwife, then the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after high.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 28.                                                                              |                                                                                                                                                                          | Sometimes Solf En                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |
| or midwife, then the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after high                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                  |                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |
| etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after high                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 25                                                                               |                                                                                                                                                                          | ***************************************                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery: (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager." "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same

accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia") Lobar pneumonia: Bronchopneumonia ("Pneumonia." unqualified, is indefinite): Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ......(name origin; "Cancer' is less definite; avoid use of "Tumor" for malignant neoplasms: Measles: Whooping cough: Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congental." "Senile." etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock." "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUER-PERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train -accident: Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory."

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and t death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in month

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the

"Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH,

state occupation at beginning of illness. If retired from

business that fact may be indicated thus: Farmer (retired

6 yrs.) For persons who have no occupation whatever,

second statement. Never return "Laborer," "Foreman,"

write None. STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same

accepted term for the same disease. Examples: Cerebro-DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," 'Foreman," "Manager," "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DIS-EASE CAUSING DEATH (the primary affection with respect to time and causation), using aways the same accepted

term for the same disease. Examples: Cerebro-spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report 'Typhoid Pneumonia'); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of \_\_\_\_\_ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measies; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," 'Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock, "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia." "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICID-AL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory."

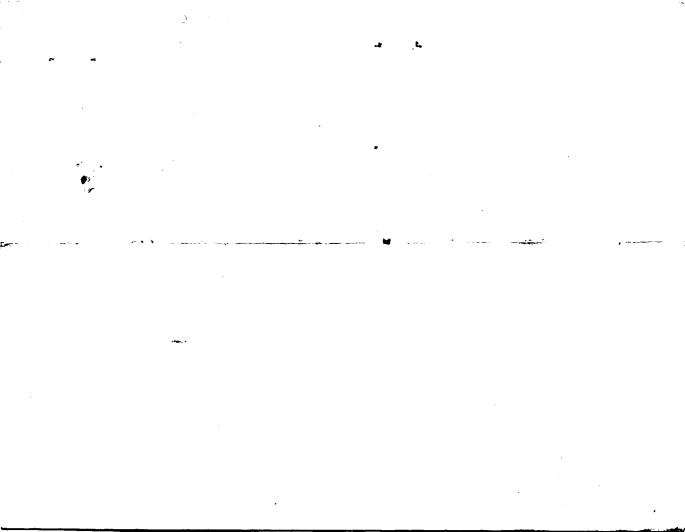

DUTY OF LOCAL REGISTRARS —Mail all death certificates filed with you to the State Registrar on or before the fifth of the following month; after keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical state-

ment of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

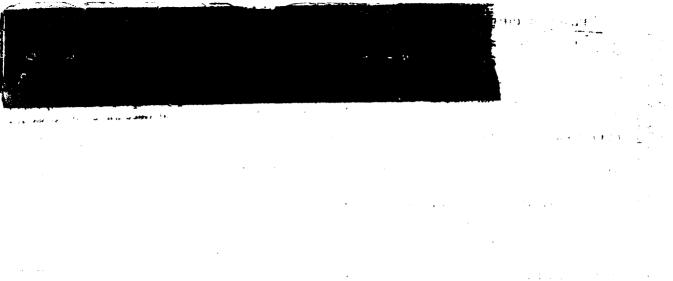

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION .- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer. Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner. (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," 'Foreman," "Manager," "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DIS-EASE CAUSING DEATH (the primary affection with respect to time and causation), using aways the same accepted

term for the same disease. Examples: Cerebro-spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhold fever (never report 'Typhoid Pneumonia'); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite): Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms: Measies; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," 'Convulsions," "Debility," ("Congenital," "Senile," etc.). "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock, "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia." "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICID-AL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory,"

DUTY OF LOCAL REGISTRARS —Mail all death certificates filed with you to the State Registrar on or before the fifth of the following month; after keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical state-

ment of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner. (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc. without more precise specifications, as Day laborer Farm Isborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 vrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"): Typhoid Fever (never report Typhoid pneumonia"): Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite): Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ................................ (name origin): "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy." "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus." "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL. SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

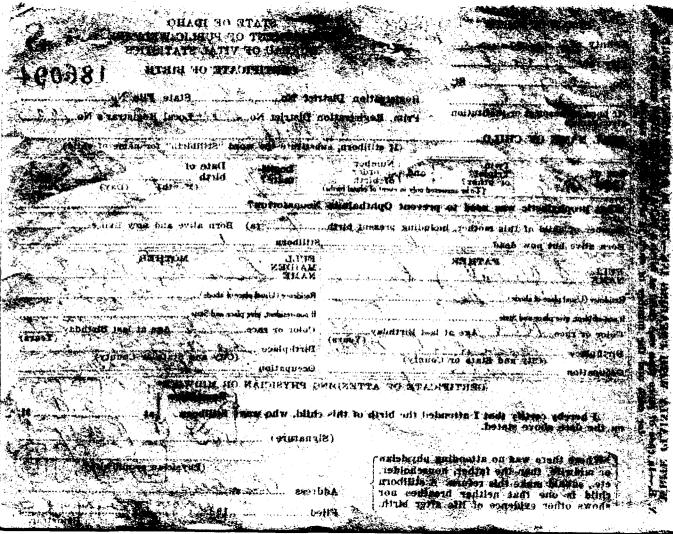

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences' (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Filed Mo. 28, 1930 Mmo Halus & all Registrar.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | NOV 28                                                                                                                                                                                                                                                                                                                  |

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery: (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc, without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and childran not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ................................ (name origin): "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

**DUTY OF LOCAL REGISTRARS**—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of oxupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc. without more precise specifications, as Day laborer Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"): Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite): Tuberculos's of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms: Measles: Whooping Cough: Chronic valvu'ar heart d'sease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia." "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.). "Dropsy," "Exhaustion." "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Mrs. A.E. Niederer Thonront

BIRTH REGISTRATION IS A PART OF EVERY CHILD'S BIRTHRIGHT. DO YOUR DUTY BY YOUR CHILD AND COMPLETE THE CERTIFICATE.

Dear Madam:

IDAHO is now in the United States Birth Registration Area and it is essential that birth certificates be made complete in every particular. Kindly fill in the information requested below and return at your earliest convenience. A franked envelope, which requires no postage, is enclosed for your use in returning the same. A government certificate for your baby will be forwarded you in due course.

STATEMENT OF OCCUPATION.—Precise statement of o supation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient. e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman. (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager." "Dealer," etc, without more precise specifications, as Day laborer Farm laborer. Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"): Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia." unqualified, is indefite): Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma. Sarcoma. etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms: Measles: Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.: Brenchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia." "Anaemia" (merely symptomatic) "Atrophy." "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.). "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition." "Marasmus." "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATE OF IDAHO DEPARTMENT OF PUBLIC WELFARE BUREAU OF VITAL STATISTICS CERTIFICATE OF BIRTH Registration District No. 20 State File No. birth stated (If born in hospital or institution . Prim. Registration District No. / Local Registrar's No. / give name.) FULL NAME OF CHILD (If stillborn, substitute the word "Stillbirth" for name of shild) Number Date of order of Sex of Legitimate?44 Child birth . (To be answered only in event of plural births) (Month) What prophylactic was used to prevent Ophthalmia Neonatorum? Born alive but now dead......Stillborn FIIIA number Residence (Usual place of abode) It non-resident, give place and State...... If non-resident, give place and State Color or race / V Age at last Birthday (Years) Birthplace ..... Birthplace ..... (Chy and State or County) (City and State or County) Occupation CERTIFICATE OF ATTENDING PHYSICIAN OR MIDWIFE\* case of I hereby certify that I attended the birth of this child, who was Stillborn on the date above stated. STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Registrar.

STATEMENT OF OCCUPATION .-- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman," "Manager," "Dealer." etc. without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia." unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sensis, tetanus) may be stated under the head of "Contributory."

**DUTY OF LOCAL REGISTRARS**—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer. Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery: (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Se-"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

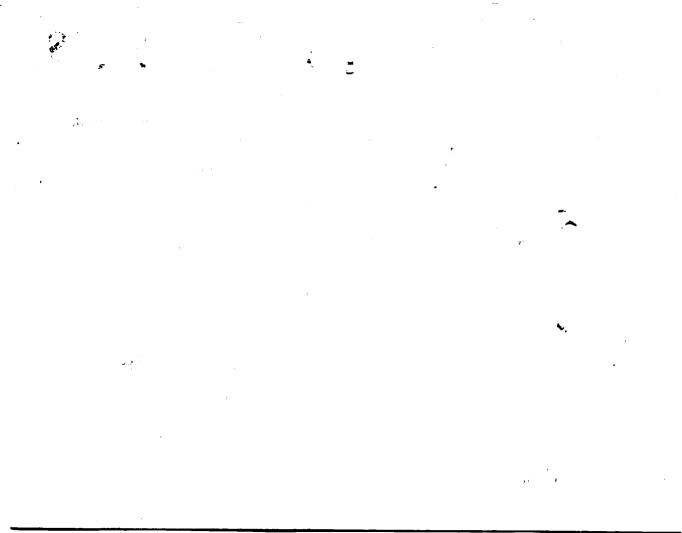

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory, The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager." "Dealer," etc. without more precise specifications, as Day laborer. Farm laborer. Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"): Typhoid Fever (never report Typhoid pneumonia"): Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite): Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ....................... (name origin); "Cancer" is less definite: avoid use of "Tumor" for malignant neoplasms: Measles: Whooping Cough: Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy." "Collapse." "Coma." "Convulsions." "Debility." ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion." "Heart Failure." "Hemorrhage." "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid—probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

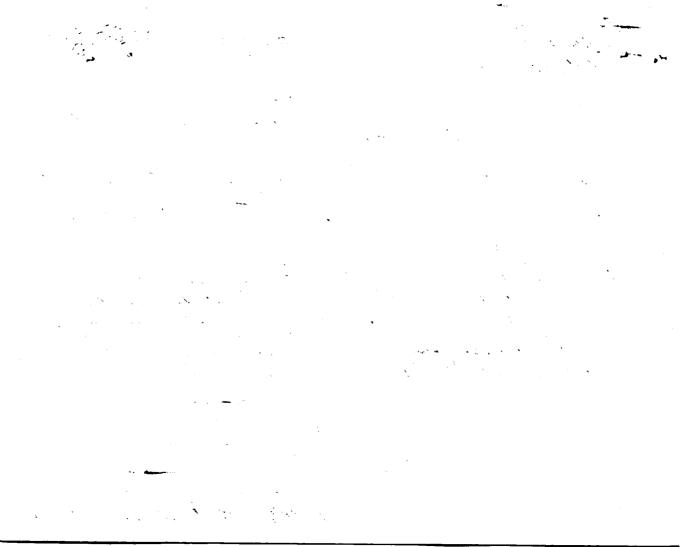

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Saleman. (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager." "Dealer." etc. without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma. Sarcoma, etc., of ...... (name origin): "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms: Measles: Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion." "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia." "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

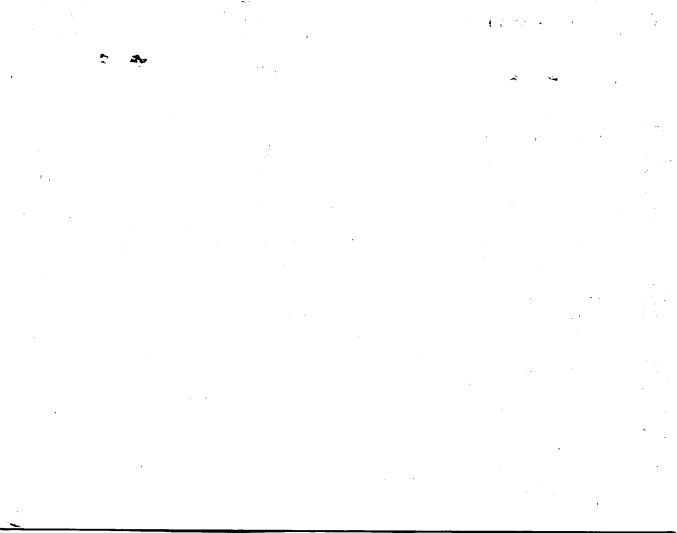

Do not accept a certificate of death signed only by a midwife.

UNDERTAKER ADDRESS                                                                                                                                                                                   |

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman. (b) Grocery; (a) Foreman. (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager." "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same

accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"): Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia") Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ......(name origin; "Cancer' is less definite; avoid use of "Tumor" for malignant neoplasms; Measles: Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congental," "Senile." etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock." "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUER-PERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train -accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory."

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer. Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc. without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"): Lobar Pneumonia; Bronchopneumonia ("pneumonia." unqualified, is indefite): Tuberculosis of lungs, meninges. peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite: avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia." "Anaemia" (merely symptomatic) "Atrophy." "Collapse," "Coma." "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion." "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL. SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train—accident: Revolver wound of head—homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

**DUTY OF LOCAL REGISTRARS**—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

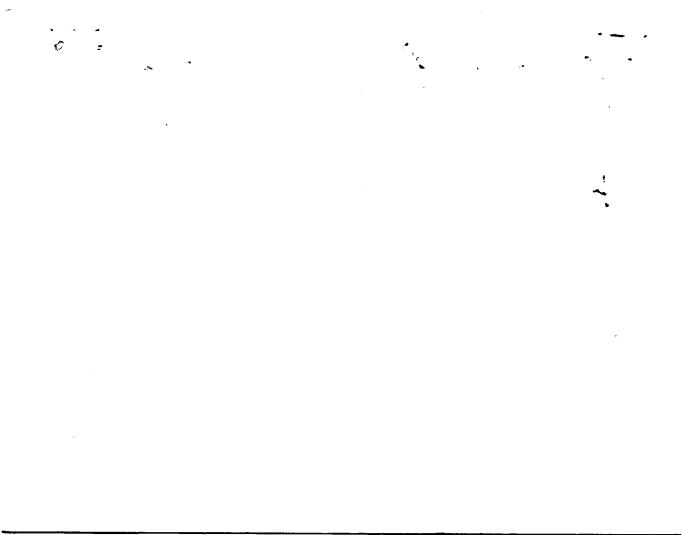

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATE OF IDAHO DEPARTMENT OF PUBLIC WELFARE RECORD County BUREAU OF VITAL STATISTICS CERTIFICATE OF BÎRTH ··· Registration District No. 90 PERMANENT State File No..... MARGIN RESERVED FOR BINDING

N S12181

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery: (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 vrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

# Information for Physicians, Midwives, Parents and Others Required to Report Births

#### REPORTS

Section 5051, Compiled Laws of Utah, 1917. That it shall be the duty of the Attending Physician or Midwife to file a certificate of birth, giving all the particulars required by this Act, with the local registrar of the district in which the birth occurred, within ten days after the date of birth. And if there be no attending physician or midwife, then it shall be the duty of the Father of the child, Householder or Owner of the premises, Manager or Superintendent of Institution in which the birth occurred, to file said certificate of birth with the local registrar within three days after the birth,

### EVERY ITEM OF INFORMATION IS IMPORTANT AND MUST BE SUPPLIED

The Full Name of the child is necessary for identification. If the child is not named when the report is made, get a blank from local registrar and make return of name as soon as child is named.

#### DO NOT OMIT ANY FACTS RELATING TO THE PARENTS OF THE CHILD

Section 5055. Compiled Laws of Utah, 1917, provides that: \* \* \* "All Physicians, Midwives, Informants \* \* \* connected with any case, and all other persons having knowledge of the facts, are hereby required to furnish such information as they may possess regarding any birth or death, upon demand of the State Registrar, in person, or by mail, or through the local registrar." \* \* \* The State Registrar will not accept as complete a certificate with this data omitted without satisfactory explanation for failure to report same.

When no physician or midwife attended a birth the persons required to make the report in the order specified in Section 5051 shall strike out the words "I hereby certify that I attended the birth of this child," and write in lieu thereof the words 'No Physician or Midwife," filling out the remainder of the certificate as the law requires and sign as father, householder, etc., as the case may be, with his address.

#### INSTRUCTIONS TO LOCAL REGISTRARS

Read carefully the law relating to the registration of births and do not allow your supply of blanks to become exhausted before requesting more. Carefully examine each certificate as soon as it is filed, and if the facts required by law are not all supplied, return same for complete report, Enter the date of filing in your office immediately; give the certificate its proper registered number and make a copy of the original certificate for your local record. If the name of the child is not reported give the person who made the return a blank for supplemental report of name and direct that it be sent to you as soon as the child is named.

Send all original certificates to the State Board of Health on or before the fifth of the month. If the supplemental report of name of child has not yet been filed, send the certificate and forward the latter report as soon as received after entering name or other fact on your copy. If the child died before being named, the report should be made with the statement "died unnamed."

Section 5059, Compiled Laws of Utah, 1917. And any physician or midwife in attendance upon a case of confinement, or any other person charged with responsibility for reporting births, in the order named in Section 5051 of this Act, who shall neglect or refuse to file a proper certificate of birth with a local registrar, within the time required by this Act, shall be deemed gullty of a misdemeanor. \* \* And any registrar, or deputy registrar, who shall neglect or fail to enforce the provisions of this Act in his district, or shall neglect or refuse to perform any of the duties imposed upon him by this Act or by the instructions and direction of the State Registrar, shall be deemed guilty of a misdemeanor. \* \* \* Any person convicted of a misdemeanor under the provisions of this Act, shall be fined in any sum not less than ten dollars nor more than two hundred dollars,

Blank birth certificates may be obtained from Local Board of Health. Local Registrars or the State Board of Health.

Statement of Occupation.—Make some entry in this section for each parent. For a woman whose only occupation is that of home housework, write housework in answer to first Question and own home in answer to second Question. For a person engaged in domestic service for wages, however, designate the occupation by the appropriate terms, as housekeeper-private family, cook-hotel, etc. For a person who has no occupation whatever write none.

To be complete, an occupation return must state:

The trade, profession, or particular kind of work done.

The industry or business in which the work is done.

In stating the occupation, avoid the use of such indefinite terms as "employee," "worker," "operative," etc. Find out the particular kind of work done and return that, as spinner, weaver, etc.

In stating the industry or business, avoid the use of such general terms as "store," "factory," "mill," etc. State the particular kind of store, factory,

mill, etc., as grocery store, soap factory, cotton mill, etc.

Distinguish carefully the different kinds of engineers by stating the full descriptive titles, as civil engineer, mechanical engineer, mining engineer, stationary engineer, etc. Avoid the term "laborer" when a more precise statement of occupation can be secured. Do not use the word "mechanic," the exact occupation, as carpenter, painter, machinist, etc. Distinguish carefully between retail merchants and wholesale merchants. A person who sells goods should be called a salesman and not a clerk.

Leavent diere nos no attending physician or midwife, then the father, householder, (Paraiclas or inidation ele, should make this return, & stillhorn child is one that neither breathes nor Move other evidence of life after birth.

STATEMENT OF OCCUPATION.—Precise statement of o supation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Saleman, (b) Grocery: (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer." etc. without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

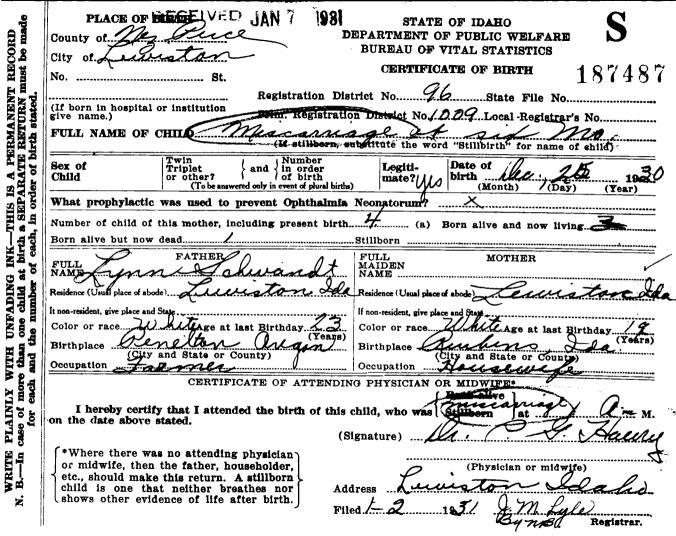

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"): Typhoid Fever (never report Typhoid pneumonia"): Lobar Pneumonia: Bronchonneumonia ("eneumonia," unqualified is indefite): Tuberculos's of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ....................... (name origin); "Cancer" is less definite: avoid use of "Tumor" for malignant neoplasms: Measles: Whooping Cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia." "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

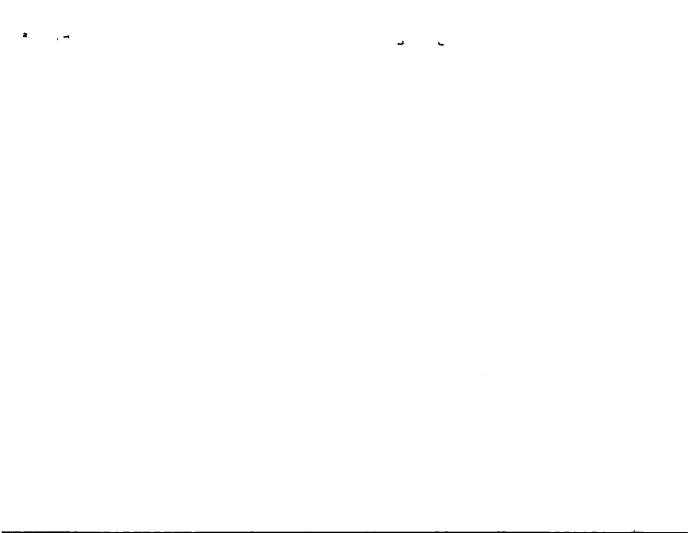

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

BIRTHPLACE OF MOTHER (cital or town (State or Country) Cremation, or Removal Date of Burial Informant 19 (Address) Address 20. Undertaker Registrar

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobilé Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

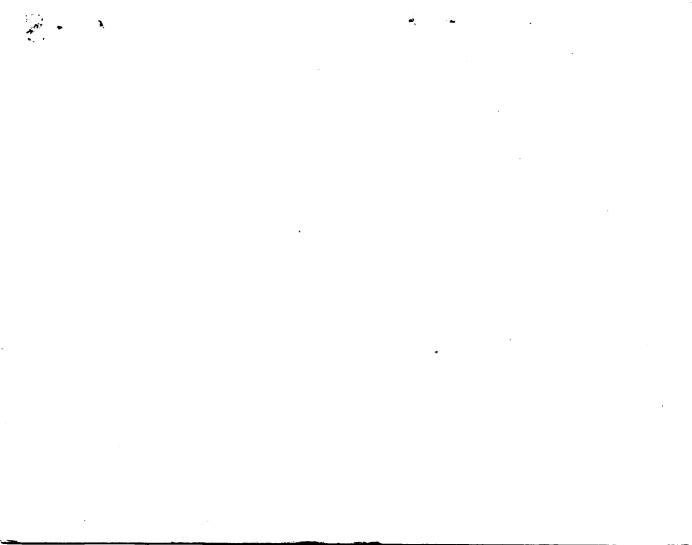

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebio-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure." "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

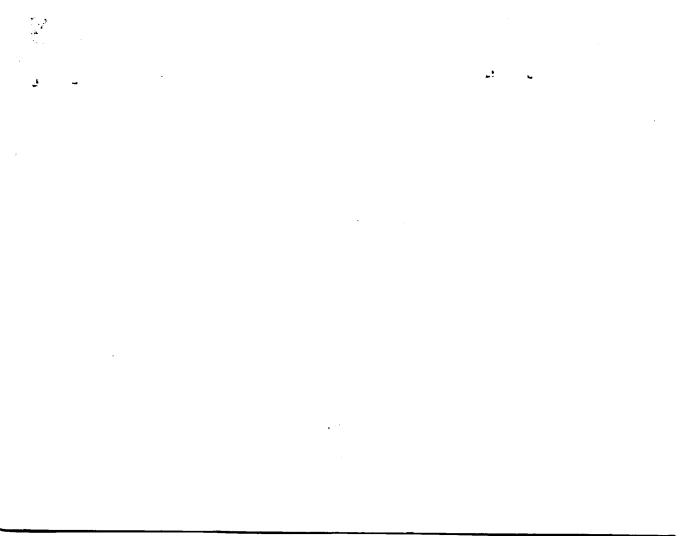

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to the lawful or suspicious means, the case should be referred to the Corener for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manage," "Dealer," etc., without more precise specifications, as day laborer, Farm laborer, Laborer—Coal mine, etc. When at home, who are engaged in the duties of the horiehold only (not paid Housekeepers, who receive a definite alary), may be entered as Housewife, Housework, or At the, and children, not gainfully employed, as At school of At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Chall," "Ulvania," "Washington," "Arabala, "Theories," "Washington," "Arabala, "Theories," "Washington," "Arabala, "Theories," "Washington," "Theories," "Washington," "Asthenia," "Theories," "Washington," "Anaemia," "Old age," "Theories," "Washington," "Theories," "T "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

PLACE OF BIRTH STATE OF IDAHO DEPARTMENT OF PUBLIC WELFARE BUREAU OF VITAL STATISTICS Registration District No..... State File No. (If born in hospital or institution Brim, Registration District No. 2085 Local Registrar's No. 5-2/ give name.) FULL NAME OF CHILD..... (If stillborn, substitute the word "Stillbirth" for name of shild) Twin Number Date of Legiti-Sex of. Triplet in order birth X Child of birth mate? (To be answered only in event of plural births) (Month) (Day) (Year) What prophylactic was used to prevent Ophthalmia Neonatorum? FULL MAIDEN Residence (Usual place of abode).... If non-resident, give place and State (City and State or County) (City and State or County) Occupation CERTIFICATE OF ATTENDING PHYSICIAN OR MIDWIFE. I hereby certify that I attended the birth of this child, who was on the date above stated. (Signature) 2 \*Where there was no attending physician or midwife, then the father, householder, etc., should make this return. A stillborn Address child is one that neither breathes nor shows other evidence of life after birth. Filed \(\Omega\)

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The guestion applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor. Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired) 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same. accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, use of "Tumor" for malignant neoplasms; Measles; Whooping cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the: fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager." "Dealer." etc. without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia." "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

**DUTY OF LOCAL REGISTRARS**—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient. e. g., Farmer, Physician, Stenographer. Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc, without more precise specifications, as Day laborer. Farm laborer. Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

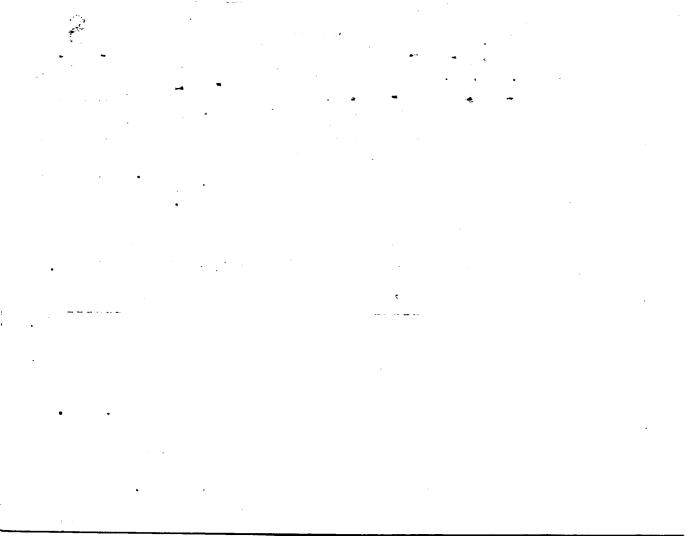

WRITE PLAINLY WITH UNFADING INK—THIS IS A PERMANENT RECORD N. B.—In case of more than one child at birth a SEPARATE RETURE must be made for each and the number of each, in order of birth stated.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

## UNITED STATES STANDARD CERTIFICATE OF DEATH

Statement of occupation—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. Make some entry in this section for every person aged 10 years or over. If the occupation had been given up or changed on account of the disease causing death, report the occupation prior to illness. If the deceased had retired from business, report the occupation prior to retirement. Children not gainfully employed may be returned as at school or at home. For a woman whose only occupation was that of home housework, write housework in answer to Question 8 and own home in answer to Question 9. For a person engaged in domestic service for wages, however, designate the occupation by the appropriate terms, as house-keeper—private jamily, cook—hotel, etc. For a person who had no occupation whatever write none.

To be complete, an occupation return must state:

- 8. The trade, profession, or particular kind of work done.
- 9. The industry or business in which the work was done.
- The month and year the deceased last worked at the occupation.
   The number of years the deceased followed the occupation.

In stating the occupation, avoid the use of such indefinite terms as "employe," "worker," "operative," etc. Find out the particular kind of work done and return that, as spinner, weaver, etc.

In stating the industry or business, avoid the use of such general terms as "store," "factory," "mill," etc. State the particular kind of store, factory, mill, etc., as grocery store, soap factory, cotton mill, etc.

Distinguish carefully the different kind of engineers by stating the full descriptive titles, as civil engineer, mechanical engineer, mining engineer, stationary engineer, etc. Avoid the term "laborer" when a more precise statement of the occupation can be secured. Do not use the word "mechanic," but give the exact occupation, as carpenter, painter, machinist, etc. Distinguish carefully between retail merchants and wholesale merchants. A person who sells goods should be called a salesman and not a clerk.

Statement of cause of death—Cause of death means the disease, injury, or complication which causes death, not the mode of dying, e. g., heart failure, asphyxia, asthenia, etc. As principal cause name the disease or injury causing death. As related causes, name earlier morbid conditions, if any, related to the principal cause and any important complication of the principal cause. Under contributory causes of importance not related to principal cause, name other important diseases or injuries. Examples:

## : Example I

The principal cause of death and related causes of importance in order of onset were Date of onset as follows:

| Arteriosclerosis                                                       | 1915                                    |
|------------------------------------------------------------------------|-----------------------------------------|
| Chronic interstitial nephritis                                         | 4004                                    |
| Cerebral hemorrhage                                                    | July 5, 1927                            |
|                                                                        | *************************************** |
| Contributory causes of importance not re-<br>lated to principal cause: |                                         |
| Fracture of arm                                                        |                                         |
| Automobile accident                                                    | May 3, 1927                             |
|                                                                        | *************************************** |

## Example II

The principal cause of death and related causes of importance in order of onset were Date of onset as follows:

| Attack of epilepsy                                                     | 1 week ago                              |
|------------------------------------------------------------------------|-----------------------------------------|
| Run over by street car                                                 |                                         |
| Peritonitis                                                            |                                         |
|                                                                        | *************************************** |
| Contributory causes of importance not re-<br>lated to principal cause: | *************************************** |
| Influenza                                                              | 6 weeks ago                             |
|                                                                        |                                         |

In a group of causes containing the principal cause and related causes, the causes should be given in the order of onset, so that in a group of three causes the principal cause may appear in either first, second, or third position. The principal cause in each of the above examples happens to be the second cause given.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

19. Place of Burial, Cremation, or Removal

Moreland Idaho 20. Undertaker

(Secondary)

Arthur W. Hall

18. Where was disease contracted if not at place of death?

Did an operation precede death?

What test confirmed diagnosis?

Was there an autopsy?.

Address

Date of Burial

Poca. Idaho

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery: (a) Foreman. (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager." "Dealer," etc. without more precise specifications, as Day laborer Farm laborer. Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 vrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"): Typhoid Fever (never report Typhoid pneumonia"): Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculos's of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite: avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart d'sease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Senile," etc.). ("Congenital." "Dropsy." "Exhaustion." "Heart Failure," "Hemorrhage," "Inanition." "Marasmus." "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

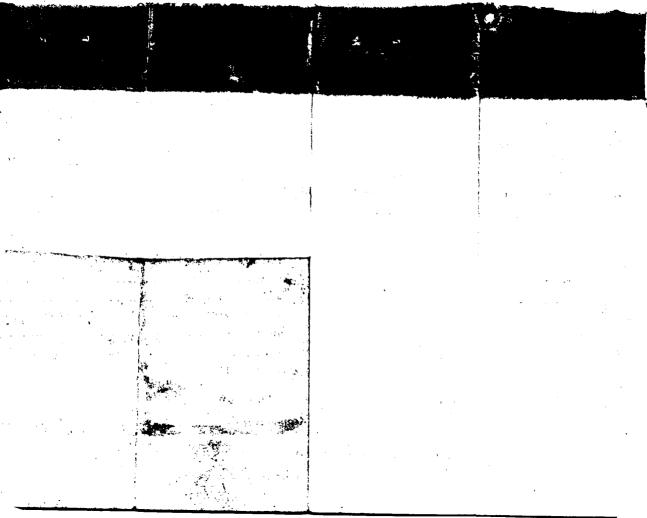

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or susplcious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

DATE OF BIRTH (month, day and year) that I last saw home, alive on and that death occurred, on the date stated above, 7. AGE EESS than 1 day. Years Months hrs or \*State the DISEASE CAUSING DEATH, or in deaths from VIOLENT CAUSES, state (1) MEANS AND NATURE OF INJURY, and (2) whether ACCIDENTAL, SUICIDAL, or HOMICIDAL. The CAUSE OF DEATH\* was as follows: annemin. 8. OCCUPATION OF DECEASED (a) Trade, profession, or particular kind of work Mone (b) General nature of industry, business, or establishment in which employed (or employer) ..... (c) Name of employer \_\_\_\_\_(duration) \_\_\_\_\_yrs. \_\_\_\_ 9. BIRTHPLACE (city or town). (State or country) CONTRIBUTORY ..... (Secondary) 10. NAME OF FATHER ......(duration) .....yrs, .....mos. 18. Where was disease contracted if not at place of death ? 11. BIRTHPLACE OF FATHER (city or (State or Country) Did an operation precede death Date of .. Was there an autopsy?..... 12. MAIDEN NAME OF MOTHER What test confirmed diagnosis should (Signed) 18. BIRTHPLACE OF MOTHER (city or tow (State or County) WRITE PLAI N. B.—Every Date of Burial 19. Place of Burial, Cremation, Informant (Address) Address Begistrar.

STATEMENT OF OCCUPATION.—Precise statement of o supation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient. e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used on'y when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery: (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer." etc. without more precise specifications, as Day laborer. Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 vrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart d'sease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion." "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age." "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia." "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.
